Projects

StudyAI – AI-Powered Cognitive Learning Ecosystem | [GitHub](#)

Mar 2026 – Present

- Architected a production-grade AI-powered LMS with responsive frontend systems and modular UI architecture
- Developed interactive Knowledge Graphs, real-time cognitive dashboards, adaptive quiz workflows, and spaced repetition interfaces
- Collaborated on secure authentication systems, REST API integrations, Dockerized deployments, and CI/CD automation
- Tech Stack: JavaScript, Django, PostgreSQL, Docker, GitHub Actions, Jenkins, Gemini API

AI resume Analyser – | [GitHub](#)

Jan 2026-Mar 2026

- Developed an AI-based system to analyze resumes and match them with job descriptions using NLP technique
- Implemented keyword extraction and similarity scoring (TF-IDF) to evaluate resume relevance
- Generated automated feedback to improve ATS compatibility and resume quality
- Tech Stack: Python, Django, NLP

ArogyaCheck – AI-Powered Early Health Risk Prediction Platform | [GitHub](#)

Jan 2026 – Mar 2026

- Engineered a healthcare analytics platform optimized for low-connectivity rural environments
- Developed a hybrid ML + heuristic-based risk engine, ORM-optimized workflows, and interactive population health dashboards
- Improved backend scalability and reduced application load time from 35s to 7s through performance optimization
- Tech Stack: Python, Django, Plotly, Matplotlib, Bootstrap, Git

Research Publication Manager | [GitHub](#)

Jun 2025 – Jul 2025

- Developed a centralized platform for publication tracking, analytics, and workflow management
- Architected normalized database schemas and automated PL/SQL validation triggers for 500+ publication records
- Built interactive analytical dashboards and reporting systems to visualize publication insights and streamline research operations
- Tech Stack: Python, Oracle Database, PL/SQL, Plotly, Streamlit

Certificates / Certifications

Cloud Computing | [Link](#)

Oct 2025

NPTEL – IIT Kharagpur

Open Source and Achievements

Solved 120+ DSA problems on LeetCode, strengthening problem solving skills in arrays
linked list, recursion and trees

Oct 2025-Present

Finalist in national-level hackathon (Code-a-Haunt 3.0), developing an AI-powered study assistant
under time constraints under tight deadlines

Feb 2026

Skills

Languages: Python, SQL, PL/SQL, HTML, CSS, Django, Flask, Next.js, JavaScript

Database and Frameworks: PostgreSQL, MySQL, Oracle Database, SQLite, Rest APIs

Tools and Domains: Git, Github, Docker, Full Stack Development, Agentic Workflows, Responsive UI/UX, Data Visualization

Education

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering — CGPA: 6.64

2023 – Present

Phagwara, Punjab

Billawar High Secondary School

12th — Percentage: 77%

2021 – 2023

Kathua, Jammu

Sant bal yogeshwar bhartiya vidya mandir

10th — Percentage: 67 %

2020 – 2021

Kathua, Jammu
