Projects

StudyAI | GitHub **Mar 2026**

- Architected a production-ready Django backend utilizing a modular 5-app system and 9 relational models to support scalable RESTful API design.
- Developed 3 autonomous AI agents - Quiz Generation, Schedule Advisor, and Tutor—leveraging Google Gemini API for structured, logic-driven outputs.
- Engineered 5-layer security and reliability pipeline — OTP email verification, rate limiting, brute force protection, session management and CSRF
- Tech Stack: Python, Django, Gemini API key, SQLite, REST APIs, Git Workflows

AIresume Analyser | GitHub **Jan 2026-Feb2026**

- Developed an AI-based system to analyze resumes and match them with job descriptions using NLP techniques.
- Implemented keyword extraction and similarity scoring (TF-IDF) to evaluate resume relevance.
- Generated automated feedback to improve ATS compatibility and resume quality
- Tech Stack: Python, Django, NLP

ArogyaCheck | GitHub **Feb 2026-Mar 2026**

- Engineered a full-stack health screening platform with complex business logic for 3 distinct user roles, addressing critical preventive care gaps for rural populations.
- Developed a Django-based predictive engine analyzing 15+ health parameters to identify risks for chronic diseases including diabetes and heart disease.
- Optimized backend architecture and server-side rendering, achieving an 80% reduction in application load time (from 35s to 7s) to ensure reliability in low-bandwidth areas.
- Tech Stack: Python, Django, Plotly, Matplotlib, Bootstrap, Git Workflows

Research Publication Manager | GitHub **Jun 2025 - Jul 2025**

- Engineered a centralized management platform to streamline research workflows for 100+ active faculty and student users.
- Architected a normalized Oracle database schema utilizing 5+ tables and automated PL/SQL validation triggers
- Reduced manual data entry errors by 85% while processing 500+ publication records
- Tech Stack: Python, Oracle Database, PL/SQL, Plotly, Streamlit

Certificates / Certifications

Cloud Computing | Link **Apr 2025**

Achievements

Solved 100+ DSA problems on LeetCode, strengthening problem solving skills in arrays, linked list, recursion and trees **Oct 2025 Present**

Finalist in national-level hackathon (Code-a-Haunt 3.0), developing an AI-powered study assistant under time constraints under tight deadlines **Mar-2026**

Skills

Languages: Python, SQL, PL/SQL, HTML, CSS, Django, Flask, Next.js, JavaScript

Database: MySQL, Oracle Database, SQLite, Git, GitHub, Docker

Domain Skills: Full Stack Development, Agentic Workflows, Responsive UI/UX, Data Visualization

Education

Lovely Professional University **2023 – Present**

Bachelor of Technology - Computer Science and Engineering — CGPA: 6.34 Phagwara, Punjab

Billawar High Secondary School **2021 – 2023**

12th — Percentage: 77 % Kathua, Jammu

Sant bal yogeshwar bhartiya vidya mandir **2020 – 2021**

10th — Percentage: 67 % Kathua, Jammu
